European Journal of Operational Research 34 (1988) 411–412
North-Holland

Contents Volume 34

1 Performance indicators—Why, where and how?
L. Fortuin
10 Defence operational analysis using system dynamics
E.F. Wolstenholme
19 Capacity expansion with interrupted demand growth
J.A. Buzacott and A.B. Chaouch
27 A generalized discount structure and some dominance rules for selecting the price-break EOQ
C. Das
39 The suitability of the weighted l_p-norm in estimating actual road distances
W. Berens
44 Multiple objective forest land management planning: An illustration
B.B. Bare and G. Mandoza
56 On the convergence of reference point methods in multiobjective programming
P. Bogetoft, Å. Hallefjord and M. Kok
69 Geometrical representations for MCDA
B. Mareschal and J.-P. Brans
78 Experiments with an interactive procedure for MOLP given weak orders on variables and objectives
M. Dror, S.I. Gass and A. Yellin
86 A graphical bicriteria approach to the resource allocation problem
W. Czuchra
92 Management of a community storage system: A coal programming model
S.B. Sinha, S.V.C. Sastry and R.P. Misra
99 Improving feasable directions for a class of nondifferentiable functions
J.M. Tamarit Goerlich
105 A methodology for computation reduction for specially structured large scale Markov decision problems
F.-Y. Ding, T.J. Hodgson and R.E. King

113 Expert systems for planning and scheduling manufacturing systems
A. Kusiak and M. Chen
131 Forecasting demand for mail order catalogue lines during the season
M.L. Chambers and R.W. Eglese
139 Income redistribution policies and decision support systems—Problems and potentials
B. Schwarz
149 Incorporating stochastic processes to overcome unmanageable decision trees
N. Pliskin
152 A visual reference direction approach to solving discrete multiple criteria problems
P. Korhonen
160 A multi-period, multiple criteria optimization system for manpower planning
J. Silverman, R.E. Steuer and A.W. Whisman
171 ADPULS in continuous time
A. Luhmer, A. Steindl, G. Feichtinger, R. Hartl and G. Sorger
178 A large-scale multilocation capacity planning model
J.G. Klincewicz, H. Luss and C.S. Yu
191 On upper bounds of sequential stochastic production planning problems
G.R. Bitran and D. Sarkar
208 A two-machine flow shop scheduling problem with controllable job processing times
E. Nowicki and S. Zdrzałka
221 Single machine scheduling to minimize weighted earliness subject to no tardy jobs
S. Chand and H. Schneeberger
231 DB2 and DB2A: Two useful tools for constructing Hamiltonian circuits
F.A. Brunacci

0377-2217/88/$3.50 © 1988, Elsevier Science Publishers B.V. (North-Holland)

237 OR Software, *H. Thiriez (ed.)*
239 Book Reviews
243 EURO Bulletin, *M. Despontin (ed.)*

249 PORTPLAN, decision support system for port terminals
K.M. Van Hee, B. Huitink and D.K. Leegwater
262 Decision support system for container terminal planning
K.M. Van Hee and R.J. Wijbrands
273 Trim-loss minimization in a crepe-rubber mill; optimal solution versus heuristic in the 2 (3)-dimensional case
W. Schneider
282 A simulation model for corporate planning in a steel plant
R.M. Narchal
297 Planning horizons for capacity expansion
V. Udayabhanu and T.E. Morton
308 Preference ranking of discrete multiattribute instances
Y. Badran
316 A 'soft' measure of consensus in the setting of partial (fuzzy) preferences
J. Kacprzyk and M. Fedrizzi
326 Use of fuzzy relations in rule-based decision support systems for business planning problems
H. Hruschka
336 The savings algorithm for the vehicle routing problem
H. Paessens
345 The reliability of a test procedure for identifying defective components
S.H. Sim
351 Approximate steady-state distribution for a large repairable item inventory system
S.C. Albright and A. Soni
362 Determination of the crop mix of a rubber and oil palm plantation—A programming approach
L.-P. Tan and C.-O. Fong
372 A Lagrangian relaxation approach to solve the second phase of the exam scheduling problem
T. Arani, M. Karwan and V. Lotfi
384 A multicut algorithm for two-stage stochastic linear programming
J.R. Birge and F.V. Louveaux
393 A parallel integer linear programming algorithm
R.L. Boehning, R.M. Butler and B.E. Gillett
399 A surrogate for linear programs with random requirements
M.A. Grove
403 Integer linear programming formulation for vehicle routing problems
G.R. Brodie and C.D.J. Waters
405 OR in practice: Results of a survey in Greece
C.P. Pappis, G.D. Nikitas and G.S. Patrikalakis
411 Contents Volume 34
